FIC/Q5006: Industrial Baker

Brief Job Description

An Industrial Baker is responsible for producing a variety of baked products on a large scale, including bread, pizza dough, biscuits, and dry cakes. The role involves selecting and preparing ingredients, mixing dough, and operating machinery while adhering to recipes, production schedules, and quality standards. The individual monitors the baking process to ensure products meet quality and safety standards and carries out post-production tasks such as packaging and labelling.

Personal Attributes

The individual should be physically fit to work for long durations. The person should be able to plan, organize, prioritize tasks and solve problems. The Individual should have good verbal and written communication skills. The person should also have good sensory skills to be able to differentiate between tastes.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [FIC/N9026: Prepare for production](#)
2. [FIC/N5003: Produce baked products in industrial units](#)
3. [FIC/N9906: Apply food safety guidelines in Food Processing](#)
4. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

FIC/N9026: Prepare for production

Description

This NOS unit is about performing various tasks prior to production in the food processing industry.

Scope

The scope covers the following:

- Plan for production
- Clean and maintain work area, machinery, and tools for production
- Organize for production

Elements and Performance Criteria

Plan for production

To be competent, the user/individual on the job must be able to:

- PC1.** identify work requirements by obtaining instructions from the supervisor. Instructions: process chart, product flow chart, formulation, chart, etc.
- PC2.** plan and prioritize tasks as per work schedule. Tasks: inspect, clean, maintain, verify, etc.
- PC3.** estimate manpower and material requirements as per work requirements. Material: raw materials and packaging materials
- PC4.** ensure the required quantity of raw materials, packaging materials, equipment, and manpower for production
- PC5.** plan capacity utilization of machinery with respect to the processing time, production order, and batch size for each product
- PC6.** plan the changeover to minimize the impact on production schedules

Clean and maintain work area, machinery, and tools for production

To be competent, the user/individual on the job must be able to:

- PC7.** clean and maintain the work area as per organizational procedures
- PC8.** clean and maintain the machines and tools and sanitize them as per the organization's specifications and standards
- PC9.** dispose of the waste material at the designated place safely. Waste material: hazardous waste, food waste, packaging waste, etc.
- PC10.** inspect the tools, equipment, and machinery to ascertain suitability for use
- PC11.** report information such as faulty tools and equipment to the concerned authority

Organize for production

To be competent, the user/individual on the job must be able to:

- PC12.** organize tools and equipment
- PC13.** receive and organize production materials appropriately. Production materials: raw materials, packaging materials, etc.
- PC14.** allot responsibilities/work to the assistants and helpers

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** production planning process
- KU2.** analysis and interpretation of various process charts, product flow charts, etc.
- KU3.** procedure to estimate manpower and raw material
- KU4.** capacity utilization calculation

Qualification Pack

- KU5.** the changeover requirements, such as change time, equipment shutdown and cleaning, changeover product specifications, equipment adjustment and setup, coding, testing and calibration, etc.
- KU6.** procedure to allot work or responsibility to the team
- KU7.** resource management process
- KU8.** methods to inspect tools, equipment and machinery
- KU9.** operating procedure and general maintenance of food production machineries
- KU10.** organizational policies and SOP on cleanliness
- KU11.** waste management procedures

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret organizational policies, SOP, production charts, etc.
- GS2.** communicate effectively with subordinates as well as supervisors
- GS3.** plan and prioritize various tasks
- GS4.** be always punctual and courteous
- GS5.** organize all process/equipment manuals to access information easily
- GS6.** discuss task lists, schedules, and activities with the senior/supervisor

FIC/N5003: Produce baked products in industrial units

Description

This unit is about producing various baked products following the applicable processes.

Scope

The scope of this role will include:

- Select and prepare ingredients for production
- Prepare the dough
- Produce and pack bread
- Produce and pack pizza dough or crust
- Produce and pack biscuits
- Produce and pack dry cakes
- Carry out the post-production activities

Elements and Performance Criteria

Select and prepare ingredients for production

To be competent, the user/individual on the job must be able to:

- PC1.** check the production order and formulation for the product
- PC2.** select raw materials based on the applicable criteria for the product/batch
- PC3.** check the quality of each ingredient based on parameters, such as appearance, colour, odour, and texture, to ensure conformance to the applicable standards and specifications
- PC4.** weigh each ingredient and take the specified amount as per the formulation of the product being produced
- PC5.** sift the flour using the flour sifter machine to remove lumps

Prepare the dough

To be competent, the user/individual on the job must be able to:

- PC6.** mix the ingredients appropriately with the flour at the recommended temperature and speed
Ingredients: refined flour or wheat flour, butter etc.
- PC7.** knead the dough manually or in a mixing machine, ensuring the appropriate dough temperature
- PC8.** check the viscosity and quality of the dough to ensure it conforms to the applicable specifications
- PC9.** extrude the dough taking appropriate precautions
- PC10.** carry out fermentation of the dough at the appropriate temperature and humidity levels as per the Standard Operating Procedure (SOP)
- PC11.** check the fermented dough at regular intervals for the required consistency

Produce and pack bread

To be competent, the user/individual on the job must be able to:

- PC12.** carry out the second stage mixing of dough for the appropriate duration, following the appropriate mixing methods
- PC13.** divide the fermented dough into pieces of the desired weight
- PC14.** mould the dough in different shapes and sizes e.g. loaves and rolls
- PC15.** laminate the dough, as required
- PC16.** carry out proofing of dough at the recommended temperature for the appropriate duration
- PC17.** monitor the proofing process to ensure the dough achieves the desired volume, texture and

Qualification Pack

size

- PC18.** bake the proofed dough at the recommended temperature
- PC19.** cool the baked bread at the appropriate temperature
- PC20.** check the quality of the baked bread to ensure it meets the applicable standards
- PC21.** slice the bread to the required thickness
- PC22.** pack the bread using the appropriate packaging material and equipment
- PC23.** label the packaging with the necessary information, including ingredients, nutritional facts, manufacturing and expiration dates
- PC24.** sample the bread and coordinate its quality analysis with the quality-testing laboratory

Produce and pack pizza dough or crust

To be competent, the user/individual on the job must be able to:

- PC25.** punch the dough, as required, to release gases and redistribute the yeast
- PC26.** divide the dough into individual portions using dough dividers
- PC27.** carry out rounding of dough to ensure uniformity and help develop the dough's structure
- PC28.** carry out proofing of dough balls for an appropriate duration to relax the gluten and make the dough easier to shape
- PC29.** laminate the dough, as required
- PC30.** carry out sheeting of dough balls, flattening and stretching them, depending on the required thickness and size of the pizza crust
- PC31.** mould the dough into its final shape and carry out proofing to enhance the dough's texture and volume
- PC32.** carry out partial baking of pizza dough to create a par-baked crust, as required, to maintain consistency
- PC33.** cool the par-baked pizza crust to prevent condensation and sogginess, as applicable
- PC34.** pack the pizza dough or par-baked crusts in the appropriate packaging materials, such as plastic wrap, vacuum-sealed bags, etc.
- PC35.** label the packaging with the necessary information, including ingredients, nutritional facts, manufacturing and expiration dates
- PC36.** store the finished dough or crusts at the recommended temperature to maintain quality and extend shelf life

Produce and pack biscuits

To be competent, the user/individual on the job must be able to:

- PC37.** prepare the dough by mixing the ingredients by following the appropriate mixing process based on the type of biscuit
- PC38.** check the consistency of the dough to ensure uniformity
- PC39.** extrude the dough taking appropriate precautions
- PC40.** laminate the dough, as required
- PC41.** carry out sheeting and rolling of the dough to the required thickness
- PC42.** cut the rolled dough into appropriate shapes depending on the type and design of biscuits being produced
- PC43.** carry out moulding to create specific shapes or designs, as required, e.g. for sandwich biscuits
- PC44.** load the cut or moulded dough pieces into industrial ovens, taking appropriate measures to prevent any damage to them
- PC45.** bake biscuits at the appropriate temperature for an appropriate duration, depending on the type of biscuits
- PC46.** cool the baked biscuits at the recommended temperature to prevent moisture buildup and maintain texture
- PC47.** carry out coating of biscuits with chocolate, sugar, or other toppings, depending on the type of biscuits
- PC48.** sandwich biscuits with appropriate fillings, such as jam, cream or chocolate, depending on the type of biscuits
- PC49.** check the biscuits for uniformity in size, shape, colour, and texture

Qualification Pack

- PC50. identify and remove the defective biscuits, e.g. malformed biscuits
- PC51. sort and align biscuits for packaging
- PC52. packed biscuits into appropriate types of packaging, such as wrappers, boxes, and tins
- PC53. follow appropriate measures during packaging to protect biscuits from moisture
- PC54. label the packaging with the necessary information, e.g. ingredients, nutritional facts, and manufacturing and expiration dates
- PC55. store the packed biscuits in a controlled environment to maintain their freshness

Produce and pack dry cakes

To be competent, the user/individual on the job must be able to:

- PC56. cream fats and sugars together until they are light and fluffy
- PC57. add the recommended number of eggs appropriately to maintain the emulsion
- PC58. mix the cake batter ingredients, such as flour, sugar, eggs, butter, leavening agents, and flavourings, ensuring even distribution of ingredients
- PC59. alternate the addition of dry ingredients, e.g. flour and leavening agents, and wet ingredients, e.g. milk and water, to the mixture to ensure a smooth batter
- PC60. prepare the batter, ensuring it is free of lumps and well-mixed with the required consistency
- PC61. incorporate additional ingredients, such as chocolate chips, nuts, or fruits, as required
- PC62. check for appropriate consistency, temperature, and viscosity to ensure the batter meets the applicable standards
- PC63. prepare the baking pans by placing the paper liners in the moulds of the baking pans
- PC64. deposit the batter into baking pans, ensuring uniformity
- PC65. ensure the batter is evenly spread in the baking pans
- PC66. load the filled baking pans into industrial ovens
- PC67. bake cakes at the recommended temperature for an appropriate duration, depending on the cake type
- PC68. monitor the cake-baking process continuously to ensure even baking
- PC69. cool the cakes appropriately for further processing to prevent condensation and sogginess
- PC70. de-pan the cakes taking appropriate measures to prevent any damage to them
- PC71. check for and trim the uneven or overbaked edges
- PC72. carry out coating of dry cakes with light coating or glaze for added flavour and moisture retention
- PC73. carry out random sampling of cakes for quality checks
- PC74. check the taste and texture of cakes to ensure they meet the applicable quality standards
- PC75. carry out primary packaging of cakes using appropriate packaging materials, such as boxes and wrappers
- PC76. label the cake packaging with the necessary information, such as ingredients, nutritional facts, manufacturing and expiration dates, etc.
- PC77. store the cakes at the recommended temperature to maintain their freshness

Carry out the post-production activities

To be competent, the user/individual on the job must be able to:

- PC78. clean and disinfect the work area, tools, equipment and machinery using the recommended cleaning agents
- PC79. follow the appropriate Clean-in-Place (CIP) and Clean-out-of-Place (COP) procedures
- PC80. carry out basic repair and maintenance of the tools, equipment and machinery
- PC81. report any discrepancies/concerns to the supervisor for immediate resolution
- PC82. ensure periodic maintenance of the tools, equipment and machinery as per the manufacturer's instructions
- PC83. carry out appropriate documentation concerning the baking operations

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** the applicable FSSAI food safety and hygiene standards
- KU2.** different types of raw materials, ingredients and finishing materials required for making various baked products
- KU3.** the chemical and physical properties of ingredients like flour, sugar, fats, leavening agents, and flavourings
- KU4.** different bread-making methods, such as sponge and dough system and straight dough system
- KU5.** different baking processes such as mixing, proofing, baking, cooling, and packaging
- KU6.** different mixing methods used for different bakery products, such as creaming, shortening, stirring method, rubbing-in method, whisking method, beating method, folding method, etc.
- KU7.** the production process, process parameters and formulation of different baked products
- KU8.** the reactions that occur during mixing, fermentation, and baking
- KU9.** how to create and modify recipes to achieve desired characteristics such as taste, texture, and shelf life
- KU10.** the use and basic maintenance of the tools and equipment used for baking various products
- KU11.** the benefits of automation in the food industry
- KU12.** the tools and equipment used for mixing and preparing the ingredients for baking, such as industrial mixers (spiral mixers, planetary mixers, continuous mixers), dough sheeters, dough dividers, dough rounders, proofing cabinets (proofers), scales and weighing equipment, and ingredient feeders
- KU13.** the use of baking equipment, such as deck ovens, rack ovens, tunnel ovens, convection ovens, rotary ovens, etc.
- KU14.** the use of cooling and storage equipment and accessories, such as cooling racks, cooling tunnels, storage bins and containers
- KU15.** the use of slicing and packaging equipment, such as bread slicers, baggers, wrappers, and labelers
- KU16.** the use of fermentation rooms, retarder/proofer, piping and depositing systems, conveyor systems and sanitation equipment
- KU17.** the use of relevant equipment for quality control, such as moisture meters, temperature probes and sensors, pH meters, and texture analyzers
- KU18.** Automation and the relevant control systems, such as Programmable Logic Controllers (PLCs), Human-Machine Interfaces (HMIs), and Data Logging Systems
- KU19.** the appropriate precautions to be taken while preparing bakery products, including the use of relevant PPE
- KU20.** Enterprise Resource Planning (ERP) Systems, Supervisory Control and Data Acquisition (SCADA) Systems, online camera and other methods to monitor the food product quality during production
- KU21.** the quality parameters and standards to be maintained for bakery products
- KU22.** the quality assessment of bakery products based on physical parameters
- KU23.** different types of packaging materials used to pack various types of baked products
- KU24.** the safe use and storage of relevant sanitizers, disinfectants and cleaning tools and equipment
- KU25.** the appropriate CIP and COP procedures
- KU26.** the relevant Good Manufacturing Practices (GMP)
- KU27.** the application of the principles of Hazard Analysis and Critical Control Points (HACCP) to baking operations
- KU28.** the basics of supply chain management including ingredient sourcing, inventory management and logistics
- KU29.** the basics of business management, including production planning, cost control, workforce management, etc.
- KU30.** the relevant environmental protection and sustainability practices
- KU31.** the applicable documentation requirements

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** maintain work-related notes and records
- GS2.** read the relevant guides and literature to get the latest information about the field of work
- GS3.** communicate clearly and politely
- GS4.** perform basic calculations
- GS5.** listen attentively to understand the instructions being given
- GS6.** identify solutions to work-related issues
- GS7.** plan and prioritise tasks to ensure timely completion
- GS8.** make quick decisions in case of an emergency/ accident

FIC/N9906: Apply food safety guidelines in Food Processing

Description

This unit covers the essential components of food safety, Good Manufacturing Practices (GMP), and personal hygiene in the food industry. It emphasizes the importance of individuals working in the food industry in protecting the health and well-being of consumers by following food safety protocols and procedures and ensuring the production of safe and high-quality food products.

Scope

The scope covers the following:

- Apply personal hygiene and follow Good Manufacturing practices at the workplace
- Implement Food Safety and pre-requisite programs (PRP) at the workplace

Elements and Performance Criteria

Apply personal hygiene and follow Good Manufacturing practices at workplace

To be competent, the user/individual on the job must be able to:

- PC1.** follow a site relevant documented procedure for Personal Hygiene and Visitor/ Contractor rules
- PC2.** follow work instructions at levels of employees inside a food manufacturing site and ensure that the relevant instructions are well communicated and being followed at the fixed timelines
- PC3.** ensure timely participate and carry out the relevant training and awareness sessions on personal hygiene, GMP, and related topics
- PC4.** ensure timely medical examination from a prescribed and authorized doctor and comply with the guidelines of Schedule IV as described in Food Safety Standard Authority of India (FSSAI) guidelines
- PC5.** fill in data in the daily monitoring checklist related to personal hygiene, food safety, and GMP
- PC6.** follow a site-relevant documented procedure and area-wise work instructions for Good Manufacturing Practices (GMP) to be followed on the site. procedure: Hand washing requirements, Gowning & De gowning protocols, cleaning, and sanitation of employee lockers, follow the protocols as laid down in the different categories of processing areas like Low Risk, High Risk, High Care areas, etc.
- PC7.** follow all validated Do's & Don'ts inside a food manufacturing firm
- PC8.** follow man and materials movement throughout the production facility, to restrict unwanted hazards to cross-contaminate the products which are being manufactured in the facility
- PC9.** refer to the process flow charts, HACCP summary plan, and critical process parameters in each and respective areas of the production line
- PC10.** identify the material requirements such as manufacturing equipment, Utensils, and other processing aids, cleaning chemicals, and cleaning work instructions in all the relevant areas of the manufacturing facility. Also, a special focus shall be given to Allergens and their risks. Wherever required, the allergen requirements shall be separately addressed
- PC11.** ensure to properly tag and number all the equipment, machinery, tools, and other processing aids to keep proper traceability of the product being manufactured and handled at the site
- PC12.** follow and implement all training and awareness guidelines in the manufacturing area and regularly participate in training effectiveness for evaluation
- PC13.** participate in audits and address the aspects of Good Manufacturing Procedures, personal hygiene, and food safety
- PC14.** ensure the record keeping and documentation such as Daily Monitoring Sheets, Batch Traceability Records, machine records, product parameters, process control parameters, etc.

Qualification Pack

Implement food safety practices at the workplace

To be competent, the user/individual on the job must be able to:

- PC15.** maintain updated facilities, equipment, and tool and design requirements to minimize the risks associated with the products being handled at the site
- PC16.** follow the instruction in the raw and packaging materials warehouse and ensure receiving material parameters match all the laid requirements. parameters: Incoming vehicles Visual report, storage, and handling requirements, hazardous and non-hazardous goods, allergens, cross-contamination risks, Quarantine, Accepted & rejected goods, monitoring temperature and humidity, etc.
- PC17.** follow FSSAI Schedule IV requirements related to Pest Control, Cleaning, and Sanitation, Utilities, Waste Disposal, Prevention of Cross-Contamination, allergen management, corrective action, preventive actions, food operation control etc.
- PC18.** ensure timely check of the critical control points and product parameters
- PC19.** record keeping and documentation such as daily monitoring sheets, cleaning sheets, parameters, etc.
- PC20.** report any food safety and GMP issue to the supervisor, if any

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** importance of personal hygiene, GMP, visitors & contractor's rules. Associated risk in case of deviation from the standard policies and how the requirement is linked with the site's FSSAI License.
- KU2.** importance of training and work instruction delivered by the supervisors.
- KU3.** importance of filling the records and checklists, formats and how to ensure that the timely and effective completion is achieved.
- KU4.** knowledge of trainings and skills required to perform in food processing premises.
- KU5.** understand FSSAI Schedule IV requirements of food handlers and PRPs within the processing area
- KU6.** importance of timely medical examinations and awareness of communicable diseases
- KU7.** Understanding of Do's & Don'ts, intellect mindset to understand the visual illustrations
- KU8.** understanding about Site Zoning plans.
- KU9.** awareness of layout which would help to demarcate the defined movements of RM, PM, FG, and wastes generated during the processing of goods. This one lays a framework to launch Good Manufacturing Practices (GMP) successfully and effectively on site
- KU10.** understand the manufacturing process, product parameters and process control parameters such as CCPs
- KU11.** understanding about Hazard Analysis and Critical Control Points (HACCP)
- KU12.** understanding about Allergens and their types and controls to monitor effective handling of allergen raw materials on site.
- KU13.** basic understanding of traceability and mock recall
- KU14.** awareness about Internal & external Audits
- KU15.** understanding for RCA CAPA, cleaning and sanitation
- KU16.** awareness about record keeping and data monitoring in various sheets as per organizational requirement

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and comprehend basic content to read labels, charts, signages, symbols and product manuals
- GS2.** communicate with coworkers appropriately to clarify instructions and other issues
- GS3.** plan and organize the work schedule, work area, tools, equipment, and materials for

Qualification Pack

- improved productivity
- GS4.** plan and prioritize tasks as per work requirements
- GS5.** always be punctual and courteous
- GS6.** good observations and intellect mindset

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following:

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values - Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc.
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.
- PC28.** follow appropriate hygiene and grooming standards

Qualification Pack

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

- PC29.** create a professional Curriculum vitae (Résumé)
- PC30.** search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively
- PC31.** apply to identified job openings using offline /online methods as per requirement
- PC32.** answer questions politely, with clarity and confidence, during recruitment and selection
- PC33.** identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** need for employability skills and different learning and employability related portals
- KU2.** various constitutional and personal values
- KU3.** different environmentally sustainable practices and their importance
- KU4.** Twenty first (21st) century skills and their importance
- KU5.** how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up
- KU6.** importance of career development and setting long- and short-term goals
- KU7.** about effective communication
- KU8.** POSH Act
- KU9.** Gender sensitivity and inclusivity
- KU10.** different types of financial institutes, products, and services
- KU11.** how to compute income and expenditure
- KU12.** importance of maintaining safety and security in offline and online financial transactions
- KU13.** different legal rights and laws
- KU14.** different types of digital devices and the procedure to operate them safely and securely
- KU15.** how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.
- KU16.** how to identify business opportunities
- KU17.** types and needs of customers
- KU18.** how to apply for a job and prepare for an interview
- KU19.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and write different types of documents/instructions/correspondence
- GS2.** communicate effectively using appropriate language in formal and informal settings
- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level: 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
